THE ACTIVE CHAPTER

On the opening day of school last fall, roll call found but twenty-one active men in the chapter. This number was soon increased to twenty-three through the affiliation of Joseph R. Maros, 1924, from Beta Rho chapter of Montana State College and Charles M. Sayre, 1925, from Alpha chapter of Denison University. Due to the rushing rules no freshman could be present until January. Brother Sayre, 1925, resigned from the Institute in December and Brother Cotlon, 1921, received his degree just before the Christmas holidays. In January the chapter suffered an additional loss when Brothers Allen, 1924, and Hoffmantal, 1925, resigned from the Institute, the former to accept a position in New York and the latter to return to his home in Omaha. When Brother McDonough, 1925, withdrew from the Institute after Christmas, and entered the office of a local architect, he was given the active chapter number before eighteen.

Rushing season opening during the first week in January netted the chapter six freshmen. G. Baer Condord, 1925, was pledged in the first term and Hartselle Kinsey, 1924, was pledged in the second term with W. R. Scott, 1922, received his degree in March. Rushing was continued on into the third term but on a less intensive basis. Sam Champion, Jr., 1926, and Guy Fristoe, also a member of the freshman class, pledge James Frew, 1926, a transfer from Cornell, was forced to leave the Institute at the close of the second term; we hope to see Jim back with us next year.

Following initiation on March 31st the chapter consisted of twenty-five men and three pledges. A second initiation was held for these three men on May 20th.

In June the chapter will lose five more officers. Brothers Taylor, Kirkham, Ludow, McKinnon and Shipley receiving their degrees at that time.

FINANCES

At the beginning of the school year last October, the chapter was in excellent shape financially. Through careful supervision of the mess and house during the past two years a cus- tomary reserve of considerable proportions had been built up. During the greater part of the first term less than $100.00 were living in the house and only a few more than that number were taking meals there where under normal conditions close to 100 would be served. We were always able to increase this number by a freshman delegation, due to the rush rules. As a result we were forced to run at a small monthly loss throughout the fall. In January came the rushing season, an extremely ex- pensive time when many were not until the middle of February that running conditions approached anywhere near to normal. By that time the recently pledged freshman delegation had moved in and several more men were taking meals with us. Even then the total number of active members and alumni upon whom the chapter was dependent for funds was much smaller than in former years so the task of rebuilding the bank balance, which had been completely wiped out since October, progressed but slowly.

At the beginning of this term we are faced with the necessity of securing sufficient funds to carry us over the summer months. A reduction in the rent continues to increase while the income from the chapter is practically nothing. The trustees have assured us of their help, the active chapter has done everything possible to reduce running expenses, and, if the alumni, some of whom owe the chapter rather large amounts on old bills will come to our aid by settling these accounts in full or even in part, Alpha Theta chapter will run no great risk of going in debt.

The outlook for the next year is brighter. We feel that we have reaped the benefits of the rush rules as to the time when the freshmen may be pledged as during the past season and the expenses of the early rush season will be comparatively light. In addition to this, and much better, is the possibility that several of the brothers who were forced to leave the Institute for various reasons during the past ten months will return in the fall.

All this for the future, and in the meantime summer comes upon us. We earnestly urge every alumnum to consider a bill for an old account to consider the serious position the chapter is in and to do his utmost to meet that obligation before the middle of the summer.

INITIATION

Due to the second term rushing season the chapter did not hold its regular initiation until Saturday, March 31st, shortly after the third term had commenced. The seven initiatives including a junior, a sophomore and five freshmen, were put through the regular stuff work out under the capable and efficient direction of Brother Matt Taylor. The ceremonies which started shortly after lunch on March 31st were conducted in a dignified manner and were aided greatly by the excellent advice and willing participation of Brother Mortimer Sorensen and the well known "sorority" brothers.

Following the initiation a modest but enjoyable banquet was held at the house, topped off by a speech by our old stand-by, Brother John R. McPherson, which echoed with good fellowship and fraternal spirit. Sev- eral "new men" were present, in- cluding John A. Clarkson, '18, Arthur E. Giffin, '19, and Angus Swift, '14, as well as correspondence from Rhode, Beta Nu, and Eta Eta chapters.

We still have one sophomore and two freshmen pledges who will be initiated on Tuesday, May 29th. Their names and write-up of the new brothers and of the pledges appear in another column of this bulletin.

THE NEW BROTHERS

Hartselle Dullrney Kinsey, 1924. "Sox" already has a degree from Roanoke College near his home town, Roanoke, Virginia, and came to Tech last fall for an M.S. in Chemical Engineering. He is an excellent student and an all-round athlete, hav- ing played center on the house bas- ketball team as well as holding various positions on the house baseball team in addition to running on the chapter relay team. He is the oldest of the incoming brothers and is capably filling his place in the Junior class and in the chapter circle.

George Baer Connard, 1925. "Baer," whose home is in Easton, Pennsylvania, is taking Naval Architecture and Marine Engineering, and is showing an interest in his professional work that is sure to net him a successful career. Besides a good scholastic standing he has done considerable activity work in the Ath- letic Association, and is now lined up for publicity manager of the basketball team.

James Baker Bamber, 1926. "Jim" halls from Reading, Pennsylvania, and is taking the course in Architectural Engineering. He is devoted to get as much out of activities as he does from his school work, and has spent the last three years with admirable pep. He has made the freshman track and basketball squads, and was one of the best players on the victorious house baseball team.

Laurence Gordon Cumming, 1926. "Larry" is the Boston representative of the new delegation. He is devoting all his spare time to radio and has made a reputation for himself as one of the experts of this vicinity. He has an affable personality and a likable demeanor that will help Alpha Theta in her social activities.

Robert Charles Dey, 1926. "Bob" is small in size but vast in energy. He was on the freshman swimming team during the fall and is now out for track of the freshman basketball team. He is taking Architecture and in his spare moments employs his artistic abilities in designing and doing work for his class. He is a good talker; at least he can always find something to talk about, and helps to keep things lively. His home is in Collierville, Tennessee.

Frank Marion Gorsuch, 1926. "Frank" comes from Kingsville, Mary- land, and has the true Southerner's disposition. He is not over fond of studying but would much prefer to tell a funny story and putter around with Pete McKinnon's Ford than to solve the stiff problems of his Electrical Engineering course. However, he is overcoming his natural aversion to labor by exercising his six foot frame pulling an endless line of fresh crew. "Frank" claims that Boston's winter climate doesn't agree with his studying but he will sooo be on the scene to see how warmer affects him.

Richard Bronson Parsons, 1926. "Parson" comes from Rhode Island, and his Yankee ingo- nity is continually prompting him to find "the reason why." He is taking Mechanical Engineering and with his logical mind and intuitive reasoning is going to make the grade on high.
The form of the bulletin has been changed this year for two reasons, the first being that the Publications Committee feels that the report form is too formal and stiff for conveying to the alumni news of the happenings in the chapter, and second, the lack of finances has forced us to 're-sort to the folded sheet rather than to the pamphlet form as heretofore used.

The Pledges

Hubert Dexter Barnes, 1925, "Hubo's" home is in Milwaukee, Wisconsin, and after two years of preparation in Mechanical Engineering has come to Tech for a course in Architecture. His house was built for the chapter and crew but the long hours required in his course have obliged him to drop them for the present.

Samuel Sloan Aitchinson, Jr., 1926, "Sam" is strong for activities and is putting up a good fight in the competition for stage manager of Tech Show. Nevertheless, he is not neglecting his studies and is passing everything in fine shape. He halls from New York City and is taking Electrical Engineering.

Rodolph Blish, 1926, "Guy" is crashing through his freshman year. He is making an enviable record in scholarship and is doing solid, conscientious work in the competition for crew manager. He comes from Rochester, New York, and is taking the course in Engineering Administration. "Guy" is going to carry home a record to be proud of.

SHALL THE CHAPTER BUY OR RENT A HOUSE?

The above question is one which has given the chapter considerable consideration during the past year. Under the conditions of the present lease if the owners desire to sell the house occupied by Sigma Chi, they may do so provided, first, that we, as present occupants, be notified of intention to sell at least one month in advance of sale and, second, that we be given first option to buy at the price stated should we desire to buy by October 1st.

Should we not care to buy the house, the owners may sell it to anyone else prior to the expiration of the lease which is on or about July 1st, 1924.

In the spring of 1922 the owners notified the chapter of their desire to sell the house; and, according to the above terms of the lease, we were given the option to buy it. A deal involving the sale of the two upper houses upon which the chapter's housing is now provided, and the sale of our rented house, chapter home, proved that we did not purchase it, was being considered by our agents and the owners of 532 Beacon Street. The price offered to the chapter was considered as entirely too high by us as well as others and so the option to buy the present house was rejected and the chapter immediately began a search for a suitable fraternity home.

Before any negotiations were made regarding the leasing or purchase of a new house, it was found that the aforementioned deal had fallen through; and hence the chapter permitted the search and discussion of another location to be dropped.

Since last fall real estate men have been active in urging the chapter to buy a chapter home. Several houses in the neighborhood were inspected but in only one case did they measure up to our requirements regarding adaptability for fraternity purposes and location. In no case did they prove suitable regarding all three requirements of price, adaptability and location.

The endowment fund has grown to the extent of almost $30,000 but still it is too small to finance the purchase of a fraternity house suitable for our needs. In Back Bay, homes are under excessive valuations and taxation. To house a chapter of thirty men in a dwelling which would be within a convenient distance to the Institute and attractive in appearance within and without would call for an expenditure at the present time of almost $50,000. A large mortgage would be called for to fill the gap between the endowment fund of $30,000 and a purchase price of close to $50,000 and we do not feel that such a burden upon the chapters of future years would justify our desire to buy a house now.

Another complicating factor in the situation is the matter of the much-discussed question of new dormitories being large enough to accommodate the present fraternity body. Considerable has been written about the dormitory situation, proposed drawings of the new building have been submitted and then rejected, and an investigation to show their need has been made but, in so far as the student body knows, there are at the present time no definite plans for new dorms to be built within the next few years. Whether or not the fraternities would move into the buildings were they to be erected is a much debated problem. The entire dormitory discussion and plan is one of great uncertainty.

At the time of writing the lease on 532 Beacon Street expires a little over a year to run before it expires. It is quite unlikely that we shall be given the opportunity to secure another lease, and in view of this eagerness on the part of the owners to sell the property. $4000 a year is a rather stiff rental for a fraternity to meet, especially when there is almost no income from the house during the summer months. Another disadvantage of the present house is the fact that it is entirely difficult to heat during the winter. The coal consumption is large and consequently is a large item of expense. Most houses facing the Charles River have the same trouble as ours. Another disadvantage is the unavoidable growing necessity for housing the servants. Its outstanding advantages are its nearness to the Institute and its adaptability for fraternity purposes.

Since January word has come to us that some of the alumni are much opposed to the chapter owning a house, for they feel that over a period of years the property is subject to considerable depreciation and also that property values are likely to decline. They propose the long-term lease in place of purchasing a chapter home. Our trustees also feel that a long-term lease is advisable where it is possible to secure a suitable home and where there is no likelihood that the chapter will find it expedient to move before the lease expires.

Just what the chapter will decide within the next year is, of course, impossible to determine just now, but suffice it to say that our caution and conservatism, supported by the able and sound advice of our Trustees, will be exerted to the utmost, before any definite decision is reached during the next year.

The foremost problem is voiced to acquaint the alumni with the situation and to enable them to understand its importance. We endeavor on the part of the chapter to find a satisfactory answer to the question of whether or not we shall buy or rent a house.

NON-ATHLETIC ACTIVITIES

In student activities the chapter has always figured very prominently, standing for not only the best and cleanest methods of government. Since Technology is noted for its efficient and practically independent student government, this is no small honor. Sigma Chis who have held positions of prominence during the past year appear below.

Brother Taylor has been a dominant figure in activities. Being treasurer of the Institute Committee and Chairman of the Recitation Committee, he has handled all the monies for athletics and for other activities. Besides this, he was secretary of the Athletic Association and undergraduate member of the Alumni Advisory Council of Athletics.

Brother Kirkham was chairman of the former Committee, president of the Interfraternity Conference, an executive member of the Institute Committee, and is a member of the Class Day Committee for commencement. Other representatives on the Institute Committee were Thomas Smith and Batem for the junior and sophomore classes respectively. Brother Conard has been competing for Publicity Manager of the M. I. T. A. A. and will in all probability occupy that position next year. Brother Meineke is a member of the Boat House Committee.

The annual Tech Show was a decided success this year and organization Sigma Chi had men in various capacities. Brother Amos, '22, was Scenery Director, and a Sig from Ela Ein chanted the song for Ripley, Jr., '21, composed a large portion of the music. Of the present active chapter Brother Murdock

(Continued on page 3)
NON-ATHLETIC ACTIVITIES
(Continued from page 2)
played a leading part in the ballet and Brother Nevin was a member of the chorus. Brother Mühlenberg was chaperone. Faculty Manager and Foods Aulichelson showed promise as freshman stage assistant.

 nons at heart entered wholeheartedly into the business end of VO0 DDO, the humorous publication, upon transferring from Mu chapter house. A result will occur in the position of Business Manager next year. In the recent class elections the last election of the class of 1925 was conferred upon Brother Bateman who polled the largest majority of votes cast for any one man. Brother Wyll has been elected to the Board of Governors of the Mechanical Engineering Society for 1923-24.

SCHOLARSHIP

This year the chapter has been unable to duplicate the high record of a year ago attained in scholarship among the twenty-one fraternities at Technology. During the first two terms the grades of the active chapter were of a considerable slump. Those of the fall term were very low. The second term marks were slightly better but still were far from cases previously attained by Sigma Chi. During rush season little studying was done by me members of the chapter or by others. Rushes which accounts to some degree for the poor showing made in March.

The chapter thoroughly appreciates its academic position and has taken steps to improve its standing. Freshmen who have been doing poor work are encouraged to spend their evenings in study unless excused by the freshman adviser. Other members of the chapter are striving to better their records this term and it is hoped that by June Alpha Theta will occupy an enviable position in the final grades.

A scholarship chart is maintained upon which appear the records of all the members of the chapter. The grades, based on a point-hour system, are plotted on the chart in such a way that his standing may easily be seen in comparison with the other brothers. Keeping such a chart enables the chapter to visualize its standing each term compared with that of the previous term and also provides an incentive to the men who are doing poor work to improve their record.

THE RUSHING RULES CONFERENCE

The rushing agreement as concluded by the fraternity managers of which Sigma Chi was a member, proved a very costly experiment. Taken as a whole the rushing rules did not prove satisfactory, although in a few instances they partly accomplished their purpose.

Conference was organized to create the following improvements in rushing. To prevent "sweat box" rushing managers to enable the freshmen and to conduct the rushing season with as little harm as possible to the students. "Follow the program" has had the rushing season come at a time other than when freshman entrance exams are being given. The motives were obviously excellent but in actual practice they did not work out at all well. The grades of both rushers and fraternity men suffered considerably during the rushing season and the new men secured only a slightly better idea of the difficulties fraternities are under than conditions when no rules existed.

Perhaps the worst sufferer from the rules were members of the Conference themselves. The financial losses sustained due to the absence of income which ordinarily comes from the freshman delegation taken in during October was excessive. Also the nature of the rushing season was such as to call for abnormally high expenses.

Dissatisfaction with the present rules is expressed by practically every member of the Conference group. As a result of this dissatisfaction delegates of nearly all the fraternities have been in session during the past month to draw up a new set of regulations. Drafts of suggested rules have been submitted to the fraternities but so far have not met with much approval. Sigma Chi has taken the stand that it will enter no agreement which calls for second term rushing or which contains rules of too drastic a nature such as were in force in the Conference during 1922-1923.

We assure our alumni that Alpha Theta chapter will enter no agreement which will bind us to observe second term rushing or which will in any way endanger our opportunity of securing a good class early next fall. Our lesson has been well learned, so we are being careful to profit from mistakes made during the past year.

ATHLETICS

In years previous Alpha Theta has been well represented in both varsity and interfraternity sports. Since M. I. T. has not had a football team for the past four years, we are unable to furnish any members for the all-Sig team. In track, however, report, Brother Glen Bateman, through only a sophomore, made the relay team which defeated Harvard and has made a good record in other meets. At present he is running the half-mile and is recording points in every meet.

Pete Shipley, our assistant manager, is in charge of the Freshmen football team and gives promise of developing into varsity material. Before the track season started, he played on the freshman basketball team.

As well as Pete McKinnon rows in the varsity shell while Brother Don Murdock is first substitute. Among the freshman athletes, Bob Dean excels on canvass. Unfortunately, Joe Nichil, Tech's star rafter, is not here, but his presence has been missed on the varsity and on the Intercollegiate teams during this winter season.

For several years past Alpha Theta has had the most complete team of men from these two fields. This year, however, there has been no exception. Brother Fletcher handled the hockey team and Brother Murdock handled the tennis team. There were the numerous assistant managers, Bob Rockefeller in wrestling, Dick Hayward, the gym team, and Corb Hoffman, while in school, the crew.

The realm of intramurals sports the chapter has taken a very active part with a fair degree of success. In a keenly contested basketball tournament the chapter's year's feat of winning the championship by defeating the D. K. E.'s so that we have the satisfaction of stealing their possession. When the time came to enter a relay team in the Class meet the whole house turned out for time trials.

In track, the last relay was the fastest field we were able to place third, not being able to equal the accomplishment of last year when we won the cup. At present a baseball season is being staged but as all the games must necessarily be played at six o'clock in the morning there is not such a superabundance of interest being displayed. The chapter lost its first game to D. E.'s by a 3 to 2 score. Brothers Van Hare, Beta Sigma, 22 and Mortimer Serat, Beta Mu, 19, now at Technology, have shown a great old Sig spirit by lining up at six o'clock in the morning to help the active chapter in its ball game. They have formed the Sigma Chi battery.

ALUMNI PERSONALS

William C. Guild, 1913, is president of the Radio Research Guild, 38-40 Clinton Street, Newark, New Jersey. Angus Swift, 1914, is again associated with Stone and Webster in the Engineering department.

Theodore E. Parker, 1911, formerly a captain in the Eighth Engineer's, United States Army, has resigned from the service and is now in the Boston office of Stone and Webster.

E. Mortimer Newlin, 1914, is at the head of the firm of E. M. Newlin and Company, with offices in the Stock Exchange Building. The firm sells investment securities and represents Bilsby and Company of Philadelphia.

Lucius S. Tyler, 1897, has re-purchased a controlling interest in the Tyler Company, renaming it the Church-Tyler Company, and has charge of suburban water supply plants, and is again located at 61-66 Pearl Street, Boston.

H. Whittemore Brown, 1915, is located at the present time at the Hampton Normal and Agricultural Institute, Virginia, where he is in charge of the Department of Building Construction. During the past three days of January he conducted a lunch builders' conference, the program for which covered all sections of the building industry.

Edward H. Clarkson, 1916, is doing engineering consulting work for Wm. Lippincott, a prominent civil and sanitary engineer of Los Angeles, California. He is living at 345 West Cedar Street, Glendale, a suburb of the City.

Paul C. Leonard, 1917, is connected with the Newark, N. J., office of the National Cash Register Company. He is the son of the late Judge Leonard, born October 24, 1922.

John W. Clark, 1918, is production manager for the Noble Company of Watertown, Massachussets.

Albert B. Clarkson, 1919, is in the Engineering department of the Lackawanna Division of the Bethlehem Steel Company. His address is 435 Richmond Avenue, Buffalo, New York.

(Continued on page 4)
ALUMNI PERSONALS

(Continued from page 3)

Joel D. Harvey, 1922, is connected with the Baldwin Electric Company of Chicago, Illinois. He is living at 522 Harry Avenue, Chicago.

William H. Scott, 1922, is taking a sales course in the employ of the Ingersoll-Rand Company of Easton, Pennsylvania.

Edward S. Farrow, Jr., 1922, is with Eastman Kodak Company at Rochester, New York. "Ed" is doing splendid work, we hear, in one of the sub departments which he is under his direction.

Frederick F. Hopkins, 1919, is at the head of one of the chemical research divisions of the Eastman Kodak Company of Rochester. He stopped at the House for a few day's this winter following his return from a vacation of several months in Europe.

John A. Clark, 1918, after a year spent in growing cotton in Mississippi, is again at the Institute as an instructor in the Physics Department. He is also studying for his doctor's degree.

William H. Rose, Jr., 1921, is assistant to the professor of the Egyptian Language Company of New York City.

Henry S. Colton, 1921, following his graduation from the Institute in December is now associated with the New Jersey Zinc Company at Palmetto, Pennsylvania.

Reginald W. Wilson, 1920, has left the Utah Light & Power Company and is now traveling in the Northwest on business of a private nature, which, we understand, will prove of great value to him in his future work.

Harry E. Rockefeller, 1922, is with the Linde Air Products Company of New York, New York. Last summer and fall he was in the sales service department transferring later to Pittsburg where he spent several weeks studying the manufacture of the steel mills and is now at the New York office.

Randall E. Spaulding, 1922, recently visited the brothers for a week upon his return from the South where he had spent the winter as cashier of one of the large hotels at Tampa Bay, Florida.

John B. McCue, 1922, is engaged as a chemical engineer in the employ of a large nitrate company in Chile, South America.

George C. McCarten, 1919, has left the New Jersey Zinc Company and has accepted a position with Sherwin & Williams, paint manufacturers, as superintendent of their lithophone plant at Chicago.

THE ACTIVE CHAPTER

Albert T. Canby, 1917, is doing research work in explosives at the Gibbs-town, New Jersey, branch of the E. I. DuPont de Nemours & Company. "Bert" became the father of a second daughter, Barbara, in November of last year.

Edwin S. Burdell, 1920, is in the banking business in Columbus, Ohio. His present address is 565 E. Broad Street, of that city.

Mitchell V. Allen, 1924, accepted a responsible position in February as assistant to Mr. P. Gilbert Hindsdale, treasurer of the Clarence Ulman & Company of New York, the well-known manufacturers and distributors of cotton goods.

David W. Guy, 1922, sailed for Europe last fall accompanied by his sister. He is now located in Paris at the following address: Care of Morgan Harjes & Company, 14 Vendome Place.

A. W. K. Billings, 1924, entered the freshman class at Harvard last fall. After a year there we understand that he is seriously considering the idea of returning to the Institute next fall to join the ranks of the architects at Homestead.

John H. Neher, 1923, returned to Princeton last fall, from where he had received his degree in 1921.

Horace G. Burt, 1924, did not return to the Institute last October on account of his poor health. "Joe" went to Colorado where he became engaged in construction work.

Engelbert B. MacDonald, 1923, after his marriage in June, moved to New York where he has been engaged as a reporter on the staff of one of the New York daily papers.

MARRIAGES

Howard V. Shipley, 1923, and Miss Virginia Malcolm, at Lynchburg, Virginia, on June 13, 1922.

Engelbert B. MacDonald, 1923, and Miss Dorothy Parrot, at Bellows Falls, Vermont, on June 13, 1922.

Edward S. Farrow, Jr., 1920, and Miss Ruth Wilson, at Nebraska City, Nebraska, on October 3, 1922.

John W. Clarkson, 1918, and Miss Elizabeth Catter, at Concord, Massachusetts, on November 13, 1922.

Hamiton L. Wood, 1917, and Miss Katherine Billings, daughter of Mr. and Mrs. Edmund Billings, of Boston, are to be married on June first.

ENGAGEMENTS

George H. Ludow, 1923, and Miss Eleanor Robinson, daughter of Mr. and Mrs. Godfrey H. Robinson of Boston, announced their engagement on January 17, 1923.

Selden Trescher, 1918, and Miss Irene Kattwinkel, daughter of Mr. and Mrs. Max Kattwinkel of West Newton, Massachusetts, announced their engagement in April.

Oswald Cammann, Jr., 1919, and Miss Mariel Trescher, daughter of Mr. and Mrs. Brainerd B. Trescher of Dayton, Ohio, announced their engagement in April.

PERSONNEL OF THE CHAPTER

On May 1st the membership of the chapter included the following men:

Robert C. Canby, Dayton, Ohio.

Holl Kirkham, Blue Mountain Lake, N. Y.

George H. Ludow, Evanston, Ill.

Hugh D. McKimmon, Chicago, Ill.

Howard V. Shipley, York, Pa.

John C. Byrne, Los Angeles, Calif.

Boydston J. Patterson, Melrose, Mass.

Hartwell B. Kinison, Reading, Pa.

Joseph R. Murdock, Helena, Mont.

E. R. M. Meredith, Olean, N. Y.

Thomas M. Nevins, New York City.

Reginald G. Wylde, Portland, Ore.

Glen L. Bateman, Johannesburg, South Africa.

Charles M. Hissman, Dayton, Ohio.

George E. Connard, Easton, Pa.

Richard F. Hayward, Cincinnati, O.

Charles R. Mulehilig, Reading, Pa.

Robert L. Rockefeller, Asbury Park, N. J.

James B. Bamford, Reading, Pa.

Robert C. Dean, Collingdale, Tenn.

Laurence G. Cumming, Boston, Mass.

Frank M. Gorozub, Kingville, Md.

Richard B. Parsons, Providence, R. I.

Proposed:

Hubert D. Barnes, Milwaukee, Wis.

Samuel C. Aubin, Jr., 1926, New York City.

Guy S. Frisbie, 1926, Rochester, N. Y.
